

e-Profile UNIT GUIDE

What eProfile is and does

- Application within Medical Operational Data System (MODS) suite which allows global tracking of all Army Soldiers who have been determined by the medical system to have a temporary or permanent medical condition that may render them medically not ready to deploy.
- Provides a fully automated profile process, Form DA 3349 entry to routing final profile to Commander.
 - It uses artificial intelligence to improve quality of profiles and enforces profile process standardization and quality control. It increases communication between Commanders and Providers, helping to ensure Soldiers get corrective intervention, either medical care or board process.
 - The application follows the Physical Profiling guidelines set forth in AR 40-501, Standards of Medical Fitness
- Has admin, profile, report, referral, MEB, PEB, MMRB, and system modules.
 - e-Profile validates user's access to different modules based on their user role.

How to Register

- go to instructions available at MEDDAC's website:
- <http://www.irwin.amedd.army.mil/pages/EPprofile.html>

Unit user roles
